

Fact Sheet: Green Mountain Energy Company Pollution FreeSM EV

Facts about *Pollution Free EV*:

- Green Mountain Energy Company launched its new Pollution FreeSM EV product in April 2011.
- *Pollution Free EV* is the first 100 percent emissions-free Texas wind-powered product offered by a Texas Retail Electric Provider (REP) that is designed exclusively for drivers of plug-in electric and plug-in hybrid electric vehicles (EV).
- *Pollution Free EV* is Green Mountain's newest 100% pollution-free, Reliable Rate product generated solely from Texas wind.
- *Pollution Free EV* guarantees customers a special rate for 12-months and is available exclusively to Texas EV drivers to encourage and facilitate the early adoption of plug-in electric vehicles, while continuing to change the way power is made.

Benefits of *Pollution Free EV*:

- Although driving an EV doesn't emit pollutants ("zero tailpipe emissions"), the fossil-fuel burned in power plants that generate the electricity used to charge EVs do. If an EV driver wants a true zero-emission vehicle, they need to power their car with pollution free power and Green Mountain's *Pollution Free EV* is generated from 100% Texas wind.
- With *Pollution Free EV*, residential customers power both their home and their EV with 100 percent Texas wind.
- *Pollution Free EV* enables Green Mountain's Texas residential customers to minimize their emissions, power both their EV and homes with wind energy and further the development of renewable energy statewide.

Who Can Purchase *Pollution Free EV*?

- *Pollution Free EV* is available to any residential customer in Texas' competitive electric market, including existing Green Mountain customers, who drive a plug-in electric or plug-in hybrid EV. The product is available to customers who lease their automobiles; ownership is not necessary.
- To demonstrate eligibility the customer must provide a valid copy of their auto insurance showing that they currently drive an EV.

About Green Mountain Energy Company

Green Mountain, the nation's leading competitive retail provider of cleaner energy and carbon offset solutions, was founded in 1997 "to change the way power is made." The company is the longest serving green power marketer in the United States. Green Mountain offers consumers and businesses the choice of cleaner electricity products from renewable sources, such as wind, as well as a variety of carbon offset products. Green Mountain's largest customer is the "world's most famous office building," the Empire State Building in New York City. Green Mountain customers have collectively helped avoid over 11.3 billion pounds of CO₂ emissions. As a wholly owned subsidiary of NRG Energy, Inc. (NYSE:NRG), Green Mountain is backed by one of the nation's largest renewable power producers. For more information, visit GreenMountain.com.
